## FACULTY WRITING TEAM MEMBERS

Randy Henry, Pearl River Community College  
Doyle Perkins, East Mississippi Community College  
David Eubanks, Mississippi Gulf Coast Community College

## ADMINISTRATOR WRITING TEAM MEMBERS

Brock Clark, Dean, Mississippi Gulf Coast Community College  
James Rush, Dean, East Mississippi Community College  
Dr. Ed Pinero, Dean, Pearl River Community College

## BUSINESS AND INDUSTRY CONTRIBUTING TEAM MEMBERS

**\*Denotes industry members who attended the writing meeting**

\*Andy Robinson, East Mississippi Electric Power Association  
\*Tom Davis, Singing River Electric, Engineering Manager  
Jason Havard, Singing River Electric Cooperative, Safety Manager  
Aaron Achord, Magnolia Electric Power, E&O Manager  
Raymond May, Pearl River Valley Electric Power Association  
Daniel Evans, Magnolia Electric Power, Engineer  
Sherry Wallace, East Mississippi Electric Power Association  
Chris Sharp, McElroy Electric, Vice President  
Andy Robinson, EMEPA, Line Supervisor  
Ed Morrow, EMEPA, Line Foreman  
Zane Royal, Logistic Engineering and Development, Owner  
Becky Canull, Four County EPA, Training Coordinator  
Joe Miller, Four County EPA, Safety Coordinator

## OFFICE OF CURRICULUM AND INSTRUCTION TEAM MEMBERS

Scott Kolle, Ph.D., Director of Curriculum, Mississippi Community College Board  
LaToya Sterling, Ph.D., Curriculum Specialist, Mississippi Community College Board  
Sheriece Robinson, Ed.D. Curriculum Specialist, Mississippi Community College Board

The Office of Curriculum and Instruction (OCI) was founded in 2013 under the Division of Workforce, Career, and Technical Education at the Mississippi Community College Board (MCCB). The office is funded through a partnership with The Mississippi Department of Education (MDE), who serves as Mississippi's fiscal agent for state and federal Career and Technical Education (CTE) Funds. The OCI is tasked with developing statewide CTE curriculum, programming, and professional development designed to meet the local and statewide economic demand.

## NATIONAL CERTIFICATION & STANDARDS

### **The National Center for Construction Education and Research**

NCCER is a not-for-profit 501(c) (3) education foundation created in 1996 as The National Center for Construction Education and Research. It was developed with the support of more than 125 construction CEOs and various association and academic leaders who united to revolutionize training for the construction industry. Sharing the common goal of developing a safe and productive workforce, these companies created a standardized training and credentialing program for the industry. This progressive program has evolved into curricula for more than 70 craft areas and a complete series of more than 70 assessments offered in over 4,000 NCCER-accredited training and assessment locations across the United States.

NCCER develops standardized construction and maintenance curriculum and assessments with portable credentials. These credentials are tracked through NCCER's Registry System that allows organizations and companies to track the qualifications of their craft professionals and/or check the qualifications of possible new hires. NCCER's Registry System also assists craft professionals by maintaining their records in a secure database.

For more information, please visit [www.nccer.org](http://www.nccer.org).

# INDUSTRY JOB PROJECTION DATA

The Utility Lineman requires Postsecondary Career and Technical Award. There is expected to be a 6.25% increase in occupational demand at the regional level and the state level and 2.09% increase at the national level. Median annual income for this occupation is \$55,971.00 at the state level. A summary of occupational data from [www.swib.ms.gov/DataCenter/](http://www.swib.ms.gov/DataCenter/) is displayed below:

**Table 1: Education Level**

Program Occupations	Education Level
FIRST-LINE SUPERVISORS/MANAGERS OF MECHANICS, INSTALLERS, AND REPAIR	WORK EXPERIENCE IN RELATED FIELD
ELECTRICAL POWER-LINE INSTALLERS AND REPAIRS	LONG TERM ON THE JOB TRAINING

**Table 2: Occupational Overview**

	Region	State	United States
2016 Occupational Jobs	5,950	5,950	597,127
2026 Occupational Jobs	6,046	6,046	613,147
Total Change	96	96	16,020
Total % Change	1.16%	1.16%	2.68%
2016 Median Hourly Earnings	\$26.91	\$26.91	\$31.27
2016 Median Annual Earnings	\$55,971	\$55,971	\$65,035
Annual Openings	10	10	55,100

**Table 3: Occupational Breakdown**

Description	2016 Jobs	2026 Jobs	Annual Openings	2016 Hourly Earnings	2026 Annual Earnings 2,080 Work Hours
FIRST-LINE SUPERVISORS/MANAGERS OF MECHANICS, INSTALLERS, AND REPAIR	4,137	4,161	2	\$26.71	\$55,557
ELECTRICAL POWER-LINE INSTALLERS AND REPAIRS	1,813	1,885	7	\$27.45	\$57,096
TOTAL	5,950	6,046	10	\$26.91	\$55,973

**Table 4: Occupational Change**

Description	Regional Change	Regional % Change	State % Change	National % Change
FIRST-LINE SUPERVISORS/MANAGERS OF MECHANICS, INSTALLERS, AND REPAIR	24	0.58%	0.58%	2.09%
ELECTRICAL POWER-LINE INSTALLERS AND REPAIRS	72	3.97%	3.97%	4.53%

# ARTICULATION

At this time, there is no secondary Utility Lineman program to articulate into this postsecondary program.

## TECHNICAL SKILLS ASSESSMENT

Colleges should report the following for students who complete the program with a career certificate, technical certificate, or an Associate of Applied Science Degrees for technical skills attainment. To use the approved Alternate Assessment for the following programs of study, colleges should provide a Letter of Notification to the Director of Career Technical Education at the MS Community College Board. Please see the following link for further instructions: <http://www.mccb.edu/wkfEdu/CTDefault.aspx>.

## **ONLINE AND BLENDED LEARNING OPPORTUNITIES**

Course content includes lecture and laboratory semester credit hours. Faculty members are encouraged to present lecture related content to students in an online or blended learning environment. Training related to online and blended learning will be available to faculty members through the MS Community College Board.

## **ASSESSMENT STRATEGIES**

The Office of Curriculum and Instruction's professional development offer assessment strategies to faculty members implementing the curriculum. Additionally, standards were included in course content when appropriate.

## RESEARCH ABSTRACT

In the fall of 2018, the Office of Curriculum and Instruction (OCI) met with the different industry members who made up the advisory committees for the Utility Lineman program. An industry questionnaire was used to gather feedback concerning the trends and needs, both current and future, of their field. Program faculty, administrators, and industry members were consulted regarding industry workforce needs and trends.

Industry advisory team members from the college involved with this program were asked to give input related to changes to be made to the curriculum framework. Specific comments related to soft skills needed in this program include having a positive attitude, being at work every day and on time, being able to work extended hours, weekend and holidays. Occupation-specific skills stated include knowing material identification, pole climbing, tool identification, underground and overhead construction, and knowledge of system operation.

## REVISION HISTORY

2011, Research and Curriculum Unit, Mississippi State University

2018, Office of Curriculum and Instruction, Mississippi Community College Board

## CREDIT BY EXAMINATION

The following **NCCER** modules are aligned to courses listed below. Each module will serve as the state recommended exam to reward credit for prior learning experiences. Colleges have the local autonomy to create a college-level exam when awarding credit.

Course Number and Name	NCCER Credential and Module
ULT 1133 Safety for Line workers	<p>NCCER Core Curriculum</p> <ol style="list-style-type: none"> <li>1. Module 00101-15 Basic Safety</li> <li>2. Module 00102-15 Introduction to Construction Math</li> <li>3. Module 00103-15 Introduction to Hand Tools</li> <li>4. Module 00104-15 Introduction to Power Tools</li> <li>5. Module 00105-15 Introduction to Construction Drawing</li> <li>6. Module 00106-15 Basic Rigging</li> <li>7. Module 00107-15 Basic Communication Skills</li> <li>8. Module 00108-15 Basic Employability Skills</li> <li>9. Module 00109-15 Introduction to Materials Handling</li> <li>10. Module 00101-15 Basic Safety</li> <li>11. Module 00102-15 Introduction to Construction Math</li> <li>12. Module 00103-15 Introduction to Hand Tools</li> <li>13. Module 00104-15 Introduction to Power Tools</li> <li>14. Module 00105-15 Introduction to Construction Drawing</li> <li>15. Module 00106-15 Basic Rigging</li> <li>16. Module 00107-15 Basic Communication Skills</li> <li>17. Module 00108-15 Basic Employability Skills</li> <li>18. Module 00109-15 Introduction to Materials Handling</li> </ol> <p>NCCER Pole Line Worker Level 1 Modules</p> <ol style="list-style-type: none"> <li>1. Module 49102 Power Line Worker Safety</li> <li>2. ULT 2133 Overhead Construction	<p>NCCER Pole Line Worker Level 1 Module</p> <ol style="list-style-type: none"> <li>1. Module 49108 Aerial Framing</li> <li>2. Module 49110 Rigging</li> <li>3. Module 49111 Setting and Pulling Poles</li> </ol>
ULT 2143 Underground Construction	<p>NCCER Pole Line Worker Level 1 Module</p> <ol style="list-style-type: none"> <li>1. Module 49112 Trenching, Excavating, Boring Equipment</li> <li>2. Module 49109 Utility Service Equipment</li> </ol>

## PROGRAM DESCRIPTION

The Lineworker Technology curriculum is designed to prepare the student for entry-level employment in the field of utility power transmission and distribution construction, troubleshooting, and repair. The curriculum includes Climbing in Elevated Work Site (Pole Climbing), Overhead Construction, Underground Construction, System Design and Operation, National Electric Safety Code, AC and DC Circuits, and Electric Power. Electives are available in advanced levels of utility line worker technology.

The line worker competencies required in this curriculum were developed to coincide with the standards for the electric power generation, distribution, and transmission industry as described in the United States Department of Labor Occupational Safety and Health Administration.

## GENERAL EDUCATION CORE COURSES

To receive the Associate of Applied Science degree, a student must complete all of the required coursework found in the Career Certificate option, Technical certificate option, and a minimum of 15 semester hours of General Education core. The courses in the General Education Core may be spaced out over the entire length of the program so that students complete some academic and Career Technical courses each semester or provided primarily within the last semester. Each community college will specify the actual courses that are required to meet the General Education Core Requirements for the Associate of Applied Science degree at their college. The Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) Section 9 Standard 3 of the *Principles of Accreditation: Foundations for Quality Enhancement*<sup>1</sup> describes the general education core.

Section 9 Standard 3:

3. The institution requires the successful completion of a general education component at the undergraduate level that
  - a) is based on a coherent rationale.
  - b) is a substantial component of each undergraduate degree program. For degree completion in associate programs, the component constitutes a minimum of 15 semester hours of the equivalent; for baccalaureate programs, a minimum of 30 semester hours or the equivalent.
  - c) ensures breadth of knowledge. These credit hours include at least one course from each of the following areas: humanities/fine arts, social/behavioral sciences, and natural science/mathematics. These courses do not narrowly focus on those skills, techniques, and procedures specific to a particular occupation or profession.

### General Education Courses

Course Number	Course Name	Semester Credit Hours	SCH Breakdown		Total Contact Hours	Contact Hour Breakdown		Certification Information
			Lecture	Lab		Lecture	Lab	
	Humanities/Fine Arts	3						
	Social/Behavioral Sciences	3						
	Math/Science	3						
	Academic electives	6

# COURSE DESCRIPTIONS

**Course Number and Name:**        **ULT 1112**        **Interpersonal Skills for Line Workers**

**Description:**                                This course is designed to cover the basic communication skills for interaction with others.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
2	2	0	30

**Prerequisite:**                                Instructor Approved

- Student Learning Outcomes:**
1. Discuss customer service.
  2. Discuss listening skills.
  3. Discuss communication.

**Course Number and Name:**        **ULT 1118**        **Electrical Lineman I**

**Description:**                                This course covers basic electricity, OSHA standards, CPR instruction and basic computer technology.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
8	4	8	180

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Demonstrate effective communication by diagramming a pre-trip inspection.
2. Demonstrate a present a pre-trip inspection.
3. Demonstrate the ability to perform basic operations of the hydraulic systems of the Derrick and Bucket Trucks.
4. Demonstrate proficiency using a basic word processor to produce a job resume to present to sponsoring companies on Job Fair Day.
5. Demonstrate the ability to discuss customer service.

**Course Number and Name:**      **ULT 1122    Line Worker Safety**

**Description:**                              This course is designed to provide fundamental safety rules and procedures needed in performing basic line worker skills.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
2	2	0	30

**Prerequisite:**                              Instructor Approved

**Student Learning Outcomes:**

1. Discuss OSHA standards 269
2. Provide approved CPR and first aid training and certification
  - a. Discuss transference and avoidance of blood borne pathogens.
3. Demonstrate the proper use of personal protective equipment as prescribed by OSHA.
4. Discuss job-site safety.
  - a. Demonstrate safety procedures relating to chain saws.
  - b. Discuss safety procedures relating to hydraulic tool operations.
  - c. Discuss pole safety inspection procedures.
5. Discuss the importance of the proper handling of HazMat (Hazardous Materials) and MSDSs (Material Safety Data Sheets) as required by OSHA.
6. Discuss/ Demonstrate proper testing, grounding , and flagging.

**Course Number and Name:**        **ULT 1128**        **Electrical Lineman II**

**Description:**                                This course covers transformers, electric codes, pole climbing, and RUS specifications.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
8	4	8	180

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Demonstate critical thinking skills to correctly perform banking and rigging.
2. Manipulate Ohm’s Law of math formulas to solve values of voltage, current, resistance, and power.

**Course Number and Name:**      **ULT 1133**              **Safety for Line Workers**

**Description:**                              This course is designed to provide fundamental safety rules and procedures needed in performing basic line worker skills.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	2	2	60

**Prerequisite:**                              Instructor Approved

**Student Learning Outcomes:**

1. Discuss OSHA standards. 269 NCCER CORE,NCCER Level 1 Module 49102,Module 49107, Module 49133
2. Provide American Red Cross CPR and first aid training and certification. NCCER CORE, Module 49102,Module 49107, Module 49133
  - a. Discuss transference and avoidance of blood-borne pathogens
3. Demonstrate the proper use of personal protective equipment as prescribed by OSHA. NCCER CORE, Module 49102,Module 49107, Module 49133
4. Discuss job-site safety NCCER CORE
  - a. Demonstrate safety procedures relating to hydraulic tool operations.
  - b. Demonstrate safety procedures relating to hydraulic tool operations.
  - c. Apply pole safety inspection procedures.
5. Explain the importance of the proper handling of HazMat (Hazardous Materials) and MSDSs (Material Safety Data Sheets) as required by OSHA. NCCER CORE, Module 49102,Module 49107, Module 49133
6. Discuss Lockout Tagout procedures. NCCER CORE, Module 49102,Module 49107, Module 49133
- 7 Discuss/Demonstrate proper grounding techniques. NCCER CORE, Module 49102,Module 49107, Module 49133
- 8.Discuss/ Demonstrate proper testing, grounding and flagging for emergency restorations. NCCER CORE, Module 49102,Module 49107, Module 49133

**Module 49113**  
**Course Number and Name:**

**Introduction to Electrical Test Equipment**  
**ULT 1144 AC and DC Circuits for Utility Line Worker Technology**

**Description:** Principles and theories associated with AC and DC circuits used in the electrical trades. Includes the study of electrical circuits, law, and formulas and the use of test equipment to analyze AC and DC circuits.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
4	3	2	75

**Prerequisite:** Instructor Approved

**Student Learning Outcomes:**

1. Demonstrate and practice general safety procedures in the school and work-site environments.
  - a. Apply relevant and appropriate safety techniques.
  - b. Demonstrate and comply with relevant OSHA safety standards.
2. Demonstrate and apply a basic AC/DC electrical circuit.
3. Demonstrate the meaning of and relationships among and between voltage, current, resistance, and power in AC and DC circuits.
  - a. Explain the relationship between voltage, current, and resistance in AC and DC circuits.
  - b. Explain how power is developed in a circuit.
  - c. Explain proper techniques for connecting a voltmeter or current meter to make measurements.
4. Analyze and evaluate the parameters of AC and DC series, parallel, and series-parallel circuits.
5. Analyze transformer voltage, current, impedance transformations, and applications.
  - a. Calculate primary and secondary transformer voltage and current as related to the transformer's turns ratio.
  - b. Explain the theory of reflected impedance between the primary and secondary, or secondaries, of utility transformers.
  - c. Explain various transformer ratings, such as voltage, current, power, impedance, frequency, and efficiency.
  - d. Explain various transformer losses such as winding losses and core losses.
  - e. Construct transformer circuits, and measure voltages and currents as calculated.

**Course Number and Name:** ULT 1152 AC and DC Circuits for Utility Line Worker Technology

**Description:** Principles and theories associated with AC and DC circuits used in the electrical trades. Includes the study of electrical circuits, laws and formulas, and the use of test equipment to analyze DC circuits.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
2	1	2	45

**Prerequisite:** Instructor Approved

**Student Learning Outcomes:**

1. Demonstrate and practice general safety procedures in the school and work-site environments.
  - a. Apply relevant and appropriate safety techniques.
  - b. Demonstrate and comply with relevant OSHA safety standards.
2. Demonstrate and apply a basic AC/DC electrical circuit.
3. Demonstrate the meaning of and relationships among and between voltage, current, resistance, and power in AC and DC circuits.
  - a. Explain the relationship between voltage, current and resistance in AC and DC circuits.
  - b. Explain how power is developed in a circuit.
  - c. Explain proper techniques for connecting a voltmeter or current meter to make measurements.
4. Analyze and evaluate the parameters of AC and DC series, parallel, and series-parallel circuits.
5. Analyze transformer voltage, current, impedance transformations and applications.
  - a. Calculate primary and secondary transformer voltage and current as related to the transformer turns ratio.
  - b. Explain the theory of reflected impedance between the primary and secondary or secondary's, of utility transformers.
  - c. Explain various transformer ratings, such as voltage, current, power, impedance, frequency, and efficiency.
  - d. Explain various transformer losses such as winding losses and core losses.
  - e. Construct transformer circuits, and measure voltage and currents as calculated.

**Course Number and Name:**      **ULT 1192**      **Fundamentals of Electricity for Line Workers**

**Description:**                      Fundamental skills associated with all electrical courses. Safety, basic tools, special tools, equipment, and introduction to AC and DC circuits.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
2	1	2	45

**Prerequisite:**                      Instructor Approved

**Student Learning Outcomes:**

1. Apply general safety procedures in the shop, lab, and industrial environment. NCCER Level 1 49103
  - a. Apply proper safety techniques for all types of circuits and components used in the utility craft.
  - b. Demonstrate an understanding of and comply with relevant OSHA, NEC, and NESC safety standards.
2. Demonstrate use of electrical tools, equipment, and references. NCCER Level 1 49103
  - a. Identify and demonstrate proper use of basic tools such as meters, drills, and other hand held equipment.
  - b. Demonstrate the use of and reading of a rule and/or measuring tape.
  - c. Locate and interpret information in the NESC relative to a specific job.
3. Solve problems using Ohm's law. NCCER Level 1 49103
  - a. List three formulae for Ohm's law.
4. Solve problems for an unknown voltage, amperage, resistance, and wattage. NCCER Level 1 49103

**National Center for Construction Education and Research Standards**

**Module 49103**      **Introduction to Electrical Circuits**  
**Module 49104**      **Introduction to Electrical Theory**

**Course Number and Name:**        **ULT 1231        Electric Power**

**Description:**                                Electrical motors and their installation. Instruction and practice in using the different types of motors, protection devices, switches, transformers, and alternators found in utility transmission

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	2	2	60

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Discuss safety and environmental protection concerns associated with electrical power equipment. NCCER Level 1 49102, ELT 2.2 ELT 3.7)
  - a. List safety precautions associated with motors and transformers.
  - b. Explain the procedures for working with an disposing of hazardous materials.
2. Wire single phase electrical components. NCCER Level 1 49103, NCCER Level 149104
  - a. Sketch and connect a single phase transformer for high and low voltage applications.
  - b. Identify, sketch and wire different types of three phase motors to include low and high voltage requirements.
  - c. Explain and demonstrate the applications of an AC generator. NCCER Level 1 49104
3. Wire three- phase electrical components.
  - a. Identify, draw, and wire different types of three-phase motors to include low and high voltage requirements.
4. Wire three-phase electrical components found in utility transmission.
  - a. Sketch and connect components found in power grids such as lighting arrestors, surge protectors, high voltage switches, arc arrestors, and others as required by the instructor. NCCER Level 1 49107
  - b. Identify low and high voltage requirements. NCCER Level 1 49109
  - c. Basic overview of electric power generation, transmission and distribution to the consumer meter. NCCER Level 49109

- National Center for Construction Education and Research Standards**
- Module 49102**
  - Module 49103**
  - Module 49104**
  - Module 49107**
  - Module 49109**

**Course Number and Name:**        **ULT1223**        **Transformer Operation and Banking**

**Description:**                                This course is designed to cover basic single phase operations and Delta and “Wye” Transformer Banks including hookups for 120/208—240/480/--120/240—277/480.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	2	2	60

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Discuss safety and environmental protection concerns associated with electrical power. Equipment.
  - a. List safety precautions associated with motors and transformers.
  - b. Explain the procedures for working with and disposing of hazardous materials.
2. Wire single phase electrical components.
  - a. Sketch and connect a single phase transformer
3. Wire three-phase electrical components.
  - a. Sketch and connect AC transformers to include delta and wye and three wire and four-wire systems.
  - b. Demonstrate installation of a three-phase open and closed transformer bank.
  - c. Discuss troubleshooting techniques.
  - d. Discuss rotation and phasing

**Course Number and Name:**        **ULT 1232        Electrical Power and Transformer Banking for Line Workers**

**Description:**                                This course is designed to cover basic single phase operations and Delta and “Wye” Transformer Banks including hookups for 120/208-240/480/--120/240\_227/480.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
2	1	2	45

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Discuss safety and environmental protection concerns associated with electrical power equipment.
2. List safety and environmental protection concerns associated with electrical power equipment.
3. Explain the procedures for working with and disposing of hazardous materials.
4. Wire single and three phase electrical components.
  - a. Sketch and connect a single and three phase transformers including delta wye and three wire and four wire systems.
5. Discuss troubleshooting techniques.
6. Discuss rotation and phasing.

**Course Number and Name:**        **ULT 1313**        **Line Worker Truck Driver**

**Description:**                                This course is designed to provide a line worker with fundamental skills needed to obtain a Class A CDL (Commercial Driver’s License) with air brake endorsement.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	2	2	60

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Demonstrate the ability to discuss safety precautions in the operation of a DOT regulated combination vehicle with air brake endorsement.
  - a. Discuss rules of the road.
  - b. Discuss precautions to take in driving during daylight and nighttime under various road conditions.
  - c. Identify and discuss highway signs and the meaning of each.
  - d. Discuss DOT rules and regulations.
2. Demonstrate the ability to plan a route and perform a pre-trip inspection.
  - a. Identify safety precautions needed prior to a trip.
  - b. Discuss the procedures to follow prior to a trip.
  - c. Perform a pre-trip inspection.
3. Demonstrate the ability to perform basic operations of the DOT regulated combination vehicle with air brake endorsement.
  - a. Safely couple and uncouple a DOT regulated combination vehicle with air brake endorsement.
  - b. Upshift and down shift a manual truck transmission.
  - c. Explain and demonstrate the use of rear and side mirrors while driving and safe spacing behind vehicles.
4. Safely perform maneuvers listed in the skills assessment as prescribed by MDOT of a combination vehicle.
5. Obtain Class A CDL with air brake endorsement.

**Course Number and Name:**        **ULT 1324**        **Truck Driving for Line Workers**

**Description:**                                This course is designed to provide a line worker with fundamental skills needed to obtain a Class A CDL (Commercial Driver’s License) with air brake endorsement.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
4	1	6	90

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Demonstrate the ability to discuss safety precautions in the operation of a DOT regulated combination vehicle with air brake endorsement.
  - a. Discuss rules of the road.
  - b. Discuss precautions to take in driving during daylight and nighttime under various road conditions.
  - c. Identify and discuss highway signs and the meaning of each.
  - d. Discuss DOT rules and regulations.
2. Demonstrate trip planning procedures.
3. Demonstrate the ability to do a pre-trip inspection
  - a. Identify safety procedures needed prior to a trip.
  - b. Discuss the procedures to follow prior to a trip
  - c. Perform a pre-trip inspection
4. Demonstrate the ability to perform basic operations of the DOT regulated combination vehicle with air brake endorsement.
  - a. Safely couple and uncouple a DOT regulated combination vehicle with air brake endorsement.
  - b. Upshift and downshift manual truck transmission.
  - c. Explain and demonstrate the use of rear and side mirrors while driving.
  - d. Explain and demonstrate the correct spacing behind vehicles.
  - e. Park a combination vehicle.
5. Develop the ability to safely maneuver a combination vehicle.
  - a. Maneuver a combination through a 12 ft opening.
  - b. Maneuver a combination through a left-hand turn at an intersection.
  - c. Maneuver a combination through right hand turn at an intersection.
6. Obtain Class A CDL with air brake endorsement.

**Course Number and Name:**      **ULT 1413**      **Pole Climbing**

**Description:**                              This course is designed to provide a line worker with fundamental skills needed to perform basic pole climbing.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	2	2	60

**Prerequisite:**                              Instructor Approved

**Student Learning Outcomes:**

1. Discuss and demonstrate use and inspection of pole climbing equipment. NCCER Level 1 49105
2. Demonstrate pole climbing skills as prescribed by industry to include 100% fall protection. NCCER Level 1 49106

**National Center for Construction Education and Research Standards**

**Module 49105 Climbing Wooden Poles**

**Module 49106 Climbing Structures Other Than Wood**

**Course Number and Name:**        **ULT 1514**        **Overhead, Underground, and Substation Construction**

**Description:**                                This course is designed to provide further fundamental training in the field of electric line work dealing with the overhead/underground line construction and substation construction.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
4	2	4	90

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Apply industry standard specifications, materials, framing, and tool nomenclature for power system construction
2. Demonstrate framing and working on poles up to full height.
3. Demonstrate transformer change out
  - a. Demonstrate rigging for transformer change out.
  - b. Demonstrate proper equipment lifting.
  - c. Demonstrate proper roper and knot tying techniques.
4. Demonstrate proper protective grounding procedures for power systems.
5. Discuss various types of devices used in substation construction.
6. Discuss the makeup of outdoor termination, elbows, and splices.
7. Discuss the fault finding techniques and various repairs.

**Course Number and Name:**        **ULT 1612**        **Computer Fundamentals for Line Workers**

**Description:**                        This course is designed to introduce students to basic computer skills.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
2	1	2	30

**Prerequisite:**                        Instructor Approved

**Student Learning Outcomes:**

1. Apply a basic understanding of an operating system.
  - a. Show basic commands of operating system software
  - b. Illustrate the use of word processing software.
  - c. Demonstrate the use of spreadsheet software.
2. Demonstrate use of Internet.
  - a. Browse the World Wide Web.
  - b. Send electronic mail.

**Course Number and Name:**        **ULT 1623**        **Lineworker Computer Fundamentals**

**Description:**                                This course is designed to introduce students to basic computer skills.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	2	2	60

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Apply a basic understanding of an operating system.
  - a. Show basic commands of operating system software.
2. Demonstrate use of the Internet.
  - a. Browse the World Wide Web
  - b. Send electronic mail.
3. Demonstrate the use of Blackboard.
4. Illustrate the use of word processing software.
5. Demonstrate the use of spreadsheet software.
6. Demonstrate the use of presentation software.

**Course Number and Name:**        **ULT 2133**        **Overhead Construction**

**Description:**                                This course is designed to provide further fundamental training in the field of electric line work dealing with the overhead line construction.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	1	4	75

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Apply industry standard specifications for pole framing. NCCER Level 1 49108
2. Discuss material and tool nomenclature. NCCER Level 1 49108
3. Demonstrate framing and working on poles up to full height. NCCER Level 1 49118
4. Demonstrate transformer change out from pole. NCCER Level 1 49110
  - a. Demonstrate rigging for transformer change out.
  - b. Demonstrate proper equipment lifting.
  - c. Demonstrate proper roper and knot tying techniques.
5. Demonstrate proper protective pole grounding procedures for power systems. NCCER Level 1 49110

**National Center for Construction Education and Research Standards**

- Module 49108 Aerial Framing**
- Module 49110 Rigging**
- Module 49111 Setting and Pulling Poles**

**Course Number and Name:**        **ULT 2143**        **Underground Construction**

**Description:**                                This course is designed to provide further fundamental training in the field of electric line work dealing with the overhead to the underground line construction.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	1	4	75

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Apply industry standard specifications for underground construction. NCCER Level 1 491019
2. Discuss material and tool nomenclature. NCCER Level 1 491019
3. Demonstrate transformer change out. NCCER Level 1 491019
  - a. Demonstrate rigging for transformer change out.
  - b. Demonstrate proper equipment lifting
  - c. Demonstrate proper rope and knot tying techniques
4. Demonstrate proper protective grounding procedures for power systems. NCCER Level 1 49112
5. Demonstrate proper protective grounding NCCER Level 1 49112
6. Demonstrate the makeup of outdoor termination, elbows and splices. NCCER Level 1 49112
7. Demonstrate the repairs of various secondary faults. NCCER Level 1 49112
8. Demonstrate the fault finding techniques. NCCER Level 1 49112

**National Center for Construction Education and Research Standards**  
**Module 49112**                                **Trenching, Excavating, Boring Equipment**  
**Module 49109**                                **Utility Service Equipment**

**Course Number and Name:**        **ULT 2233        System Design and Operation**

**Description:**                                This course includes operation basics for protection of the electrical systems overhead, underground, and substation

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	1	4	75

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Discuss types and uses of fuses. NCCER Level 1 49109
2. Discuss types and uses of oil circuit recloses NCCER Level 1 49109
3. Discuss the types and uses of regulators. NCCER Level 1 49109
4. Discuss the types and uses of capacitor banks. NCCER Level 1 49109
5. Discuss the types and uses of sectionalizers. NCCER Level 1 49109
6. Discuss the protective equipment use on lateral and dip/riser poles. NCCER Level 1 49109

**Course Number and Name:**        **ULT 2333    Advanced Utility Equipment Operation**

**Description:**                                This course provides an in-depth understanding of the operation of line worker equipment.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
3	2	2	60

**Prerequisite:**                                Instructor Approved

**Student Learning Outcomes:**

1. Demonstrate the safe use and operation of an aerial lift truck. NCCER Level 1 49109
2. Demonstrate the safe use and operation of a digger derrick. NCCER Level 1 49109
3. Demonstrate the safe use and operation of a trencher/other equipment NCCER Level 1 49109
4. Demonstrate the safe use and operation of a fork lift. NCCER Level 1 49109
5. Demonstrate the safe use and operation of a chainsaw. NCCER Level 1 49109
6. Demonstrate the safe use and operation of an ATV/RTV/UTV. NCCER Level 1 49109

**Course Number and Name:**        **ULT 291(1-3) Special Project**

**Description:**                        Practical application of skills and knowledge gained in other electrical or electrical related technical courses. This instructor works closely with the student to insure that the selection of a project will enhance the student's learning experience.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
1	0	2	30
2	0	4	60
3	0	6	90

**Prerequisite:**                        Instructor Approved

**Student Learning Outcomes:**

1. Develop a written plan and blueprints that detail the activities and projects to be completed.
  - a. Utilize a written plan that details the activities and projects to be completed.
  - b. Perform written occupational objectives in the special project.
2. Assess accomplishment of objectives.
  - a. Prepare daily written assessment of accomplishment of objectives.
  - b. Present weekly written reports to the instructor in activities performed and objectives accomplished.
3. Utilize a set of written guidelines for the special project.
  - a. Develop and follow a set of written guidelines for the special project.

**Course Number and Name:** ULT 292(1-3) Special Project

**Description:** Practical application of skills and knowledge gained in other electrical or electrical related technical courses. This instructor works closely with the student to insure that the selection of a project will enhance the student's learning experience.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
1	0	2	30
2	0	4	60
3	0	6	90

**Prerequisite:** Instructor Approved

**Student Learning Outcomes:**

4. Develop a written plan and blueprints that detail the activities and projects to be completed.
  - c. Utilize a written plan that details the activities and projects to be completed.
  - d. Perform written occupational objectives in the special project.
5. Assess accomplishment of objectives.
  - c. Prepare daily written assessment of accomplishment of objectives.
  - d. Present weekly written reports to the instructor in activities performed and objectives accomplished.
6. Utilize a set of written guidelines for the special project.
  - b. Develop and follow a set of written guidelines for the special project.

**Course Number and Name:**            **ULT 293. (1-3) Special Project**

**Description:**                            Practical application of skills and knowledge gained in other electrical or electrical related technical courses. This instructor works closely with the student to insure that the selection of a project will enhance the student's learning experience.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Lab	Contact Hours
1	0	2	30
2	0	4	60
3	0	6	90

**Prerequisite:**                            Instructor Approved

**Student Learning Outcomes:**

7. Develop a written plan and blueprints that detail the activities and projects to be completed.
  - e. Utilize a written plan that details the activities and projects to be completed.
  - f. Perform written occupational objectives in the special project.
8. Assess accomplishment of objectives.
  - e. Prepare daily written assessment of accomplishment of objectives.
  - f. Present weekly written reports to the instructor in activities performed and objectives accomplished.
9. Utilize a set of written guidelines for the special project.
  - c. Develop and follow a set of written guidelines for the special project.

**Course Number and Name:** ULT 294 (1-3) Supervised Work Experience I

**Description:** A cooperative program between industry and education and is designed to integrate the student's technical studies with industrial experience. Variable credit is awarded on the basis of semester hour per 45 industrial contact hours.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Externship	Contact Hours
1-6	0	3-9	45-135

**Prerequisite:** Instructor Approved

**Student Learning Outcomes:**

1. Apply technical skills needed to be a viable member of the workforce.
  - a. Prepare a description of technical skills to be developed in the supervised work experience program
  - b. Develop technical skills needed to be a viable member of the workforce.
2. Apply skills developed in other program area courses.
  - a. Perform skills developed in other program area courses in the supervised work experience program
3. Apply human relationship skills.
  - a. Practice human relationship skills in the supervised work experience program.
4. Apply and practice positive work habits and responsibilities.
  - a. Perform assignments to develop positive work habits and responsibilities.
5. Work with the instructor and employer to develop written occupational objectives to be accomplished.
  - a. Perform written occupational objectives in the supervised occupational experience program
6. Assess accomplishment of objectives.
  - a. Prepare daily written assessment of accomplishment of objectives.
  - b. Present weekly written reports to instructor in activities performed and objectives accomplished
7. Utilize a set of written guideline for the supervised work experience
  - a. Develop and follow a set of written guidelines for the supervised work experience.

**Course Number and Name:** ULT 295 (1-3) Supervised Work Experience II

**Description:** A cooperative program between industry and education and is designed to integrate the student's technical studies with industrial experience. Variable credit is awarded on the basis of semester hour per 45 industrial contact hours.

**Hour Breakdown:**

Semester Credit Hours	Lecture	Externship	Contact Hours
1-6	0	3-9	45-135

**Prerequisite:** Instructor Approved

**Student Learning Outcomes:**

8. Apply technical skills needed to be a viable member of the workforce.
  - c. Prepare a description of technical skills to be developed in the supervised work experience program
  - d. Develop technical skills needed to be a viable member of the workforce.
9. Apply skills developed in other program area courses.
  - b. Perform skills developed in other program area courses in the supervised work experience program
10. Apply human relationship skills.
  - b. Practice human relationship skills in the supervised work experience program.
11. Apply and practice positive work habits and responsibilities.
  - b. Perform assignments to develop positive work habits and responsibilities.
12. Work with the instructor and employer to develop written occupational objectives to be accomplished.
  - a. Perform written occupational objectives in the supervised occupational experience program
13. Assess accomplishment of objectives.
  - a. Prepare daily written assessment of accomplishment of objectives.
  - b. Present weekly written reports to instructor in activities performed and objectives accomplished
14. Utilize a set of written guideline for the supervised work experience
  - a. Develop and follow a set of written guidelines for the supervised work experience.

# APPENDIX A RECOMMENDED TOOLS AND EQUIPMENT

## Capitalized Items

1. Bucket truck
2. Trailer/Truck required for CDL Class A License
3. Utility truck with derrick (2)

## Non-Capitalized Items

1. Hole Digger \*(3)
2. Tamp-Wood\*(2)
3. Tamp-Metal\*(1)
4. Rock Bar\* (1)
5. Chain Hoist (1-1/2 TON COFFING)\* (1)
6. Chain Hoist (1-TON) \*(1)
7. Strap Hoist\* (2)
8. 14-ft Pike Poles\*
9. 12-ft Pike Poles\*
10. Nylon Slings\*(1)
11. Pulling Grip (may need wire grip and guy grip depends on the type bought)\*(10)
12. 18-ft Bolt Cutter
13. 36-ft BOLT CUTTERS\* (1 per student)
14. Cant Hook\* (1)
15. Shovel-Round Nose\* (1 per student)
16. Transformer Gin (1)
17. Bit-Wood 11/16\*(2)
18. Bit Wood 13/16\*(2)
19. GAFF Maintenance Kit (1)
20. Ground Rod Driver\* (1)
21. Pulling Eye\* (1)
22. Hand Line Hook\* (6)
23. Hand Line Block\* (6)
24. Hand Line Snap\* (6)
25. Hand Line Rope 600 ft \*
26. Guy Wire Dispenser
27. Bit Brace\* (3)
28. Body Belt (1 per student)
29. Safety Strap (1 per student)
30. Tool Pouch (1 per student)
31. Nut and Bolt Bag (1 per student)
32. Climbers (1 pair per student)
33. Top Straps (1 pair per student)
34. Top Pads (1 pair per student)
35. Gutt Strap (1 per student)
36. Tool Bag (1 per student)
37. Gaff Guards (1 per student)
38. Body Harness (1 per student)
39. 18-in. Lanyard (1 per student)
40. Orange barrels, plastic (10)
41. Orange traffic cones, 18 in., plastic (50)

## RECOMMENDED INSTRUCTIONAL AIDS

It is recommended that instructors have access to the following items:

1. Computer with operating software with multimedia kit (1)
2. Data projector (1)
3. Interactive display board (1)
4. Laptop computer (1)
5. Printer (1)
6. Projector, overhead (1)
7. DVD (1)

## Fall Arrest System

1. BUCKINGHAM BEAM (5203)\*
2. BUCKINGHAM LIFE LINE (5201-50)\*
3. ROPE GRAB (3/4)\*
4. 100% fall safety

\* Will depend on number of students

## Tools Students Will Need (one per student)

1. 9-in. KLEIN SIDE CUT PLIERS
2. 12-in. CREASANT WRENCH
3. SCREWDRIVER
4. CHANNLOCK PLIERS
5. RULER
6. BALL-PEEN HAMMER
7. HARD HAT
8. SAFETY GLASSES
9. WORK GLOVE

## APPENDIX B CURRICULUM DEFINITIONS AND TERMS

- Course Name – A common name that will be used by all community colleges in reporting students
- Course Abbreviation – A common abbreviation that will be used by all community and junior colleges in reporting students
- Classification – Courses may be classified as the following:
  - Career Certificate Required Course – A required course for all students completing a career certificate.

Technical Certificate Required Course – A required course for all students completing a technical certificate.

- Technical Elective – Elective courses that are available for colleges to offer to students.
- Description – A short narrative that includes the major purpose(s) of the course
- Prerequisites – A listing of any courses that must be taken prior to or on enrollment in the course
- Corequisites – A listing of courses that may be taken while enrolled in the course
- Student Learning Outcomes – A listing of the student outcomes (major concepts and performances) that will enable students to demonstrate mastery of these competencies

The following guidelines were used in developing the program(s) in this document and should be considered in compiling and revising course syllabi and daily lesson plans at the local level:

- The content of the courses in this document reflects approximately 75% of the time allocated to each course. The remaining 25% of each course should be developed at the local district level and may reflect the following:
  - Additional competencies and objectives within the course related to topics not found in the state framework, including activities related to specific needs of industries in the community college district
  - Activities that develop a higher level of mastery on the existing competencies and suggested objectives
  - Activities and instruction related to new technologies and concepts that were not prevalent at the time the current framework was developed or revised
  - Activities that include integration of academic and career–technical skills and course work, school-to-work transition activities, and articulation of secondary and postsecondary career–technical programs
  - Individualized learning activities, including work-site learning activities, to better prepare individuals in the courses for their chosen occupational areas
- Sequencing of the course within a program is left to the discretion of the local college. Naturally, foundation courses related to topics such as safety, tool and equipment usage, and other fundamental skills should be taught first. Other courses related to specific skill areas and related academics, however, may be sequenced to take advantage of seasonal and climatic conditions, resources located outside of the school, and other factors. Program must include a minimum of 15 semester hours of General Education Core Courses. The courses in the General Education Core may be spaced out over the entire length of the program so that students complete some academic and Career Technical courses each semester. Each community college specifies the actual courses that are required to meet the General Education Core Requirements for the Associate of Applied Science Degree at their college.

- In order to provide flexibility within the districts, individual courses within a framework may be customized by doing the following:
  - Adding new student learning outcomes to complement the existing competencies and suggested objectives in the program framework
  - Revising or extending the student learning outcomes
  - Adjusting the semester credit hours of a course to be up 1 hour or down 1 hour (after informing the Mississippi Community College Board [MCCB] of the change)

## APPENDIX C: RECOMMENDED TEXTBOOK LIST

<b>Recommended Utility Lineman Text Book List</b> <b>CIP: 43.0303 - Utility Lineman</b>		
<b>Book Title</b>	<b>Author (s)</b>	<b>ISBN</b>
Safety Manual Promoting a safe and injury free work environment for public power	American Public Association	
The Lineman's and Cableman's Handbook	Thomas M. Shoemaker James E. Mack	978-0-07-174258-0
The Guidebook for Linemen & Cablemen 2 <sup>nd</sup> Edition	Wayne Van Soelen	13:978-1-1110-3501-3
NESC Handbook		10:1259584151
Power Lineworker		10:0132571099
NCCER CORE	NCCER	
NCCER Level 1 Lineman	NCCER	

## APPENDIX D: COURSE CROSSWALK

<b>Course Crosswalk</b>					
<b>Utility Lineman (CIP: 43.0303)</b>					
<i>Note: Courses that have been added or changed in the 2018 curriculum are highlighted.</i>					
Existing			Revised
